A unique student life!

The school's students union.

Weekends' organization, diners, parties, leisure, building site clothes...

Students company

Small business project. 🔗Brochure & information here >>>
Basque “pelota” – This association plans and organizes each year in mid-september a special day tournament. All the students and professors are invited to participate.
Collective Development Project - 5th year.

In the final year of their academic studies, ISA BTP engineering students (with a local partner NGO) achieve a structured and tutored collective international development project.

The project consists of building a school or a health center.

Students are in charge of fundraising, planning, design, logistics backup, site preparation and construction.
